

HAZARD ALERT

Log Transport

Chaining up while still loading is a dangerous practice and could result in injury or death.

Ernslaw One Log Transport Safety Rule:

☞ There will be **NO** chaining up of the truck or the trailer until all loading is finished.

Ernslaw One acknowledges that most log truck drivers are professionals committed to safe work practices, but a few people need reminding of this simple safety rule which has been put in place to prevent injury and save lives.
